JavaScript · TypeScript · React · React Native · HTML · CSS · Redux · Redux Toolkit · GraphQL/Apollo · Git

TECHNOLOGIES I AM FAMILIAR WITH

NextJS · MobX · NodeJS · MongoDB/mongoose · SQL · Sequelize · Jest · Docker

LANGUAGES

Ukrainian

English

SUMMARRY

I am a JavaScript developer seeking a full-time position preferably with the option to work remotely, in a company that creates innovative business solutions. With almost 3 years of commercial experience developing web and mobile applications using React and React Native, I am a fast learner and eager to continue growing in this industry. I understand the principles of Full-Stack development and know how to construct complex interfaces. I can work well on my own for independent projects, and also work effectively as part of a team.

EXPERIENCE

React Native Developer, Binary Studio

MARCH 2021 — NOVEMBER 2022

I worked on two mobile applications. The first project involved refactoring, maintaining, and adding new features to a mobile application designed for homeowners' association (HOA) management. The second project was a mobile application for construction project management, which I developed from scratch. Both projects required active communication with a foreign client throughout the development process.

React/React Native Developer, Computools

MAY 2023 — MARCH 2024

My role was to mainly maintain already existing project, refactor, bugfixing, and develop additional features for several projects such as Spotify-like music web application, TikTok-like social media mobile application, mobile application for people who provide beauty services, and mobile application for their clients. All projects required active communication with a foreign client throughout the development process.

EDUCATION

Bachelors Degree, National Technical University of Ukraine "Igor Sikorsky Kyiv Politechnic Institute"

SEPTEMBER 2018 — JUNE 2022

Faculty of Applied Math, 121 Software Engineering
